# What's Magento 2 Hide Price?

Manage Price Display with Magento 2 hide price extension. Magento 2 Hide Price for Guest Extension helps you optimize your pricing strategy by enabling price-hide for guest users. It works by hiding product prices on selected products, categories, and sub-categories from specific customer groups such as non-logged-in, wholesalers, retailers, etc.

## Features

1. Enable/Disable extension from a backend
2. Define the label for the hidden price.
3. Increase conversion rate with more users to register.

Here is what`s trending on Luma right now

Radiant Tee
login first to see price

Breathe-Easy Tank

## Important Notes and Requirements

1. Requirements: **Magento Community 2.1.x up to 2.3.4, Magento Enterprises (2.1.x to latest).**
2. Server-Side Requirements: *MySQL 5.0 and above PHP 7.1.6 and above.*
3. All functionality is fully tested on Magento Community Edition 2.2.2 and will be compatible with Editions from 2.1.x up to 2.3.4.
4. **Magento Enterprises Edition is also supported but not tested.**
5. **For your safety related to any damage or loss to your store, it's strongly recommended to you that take a backup first.**

## Installation

1. Unpack the extension ZIP file on your computer.
2. Connect to your website source folder with FTP/SFTP/SSH client and **upload all** the files and folders from the extension package to the corresponding **root folder** of your Magento 2. x installation:
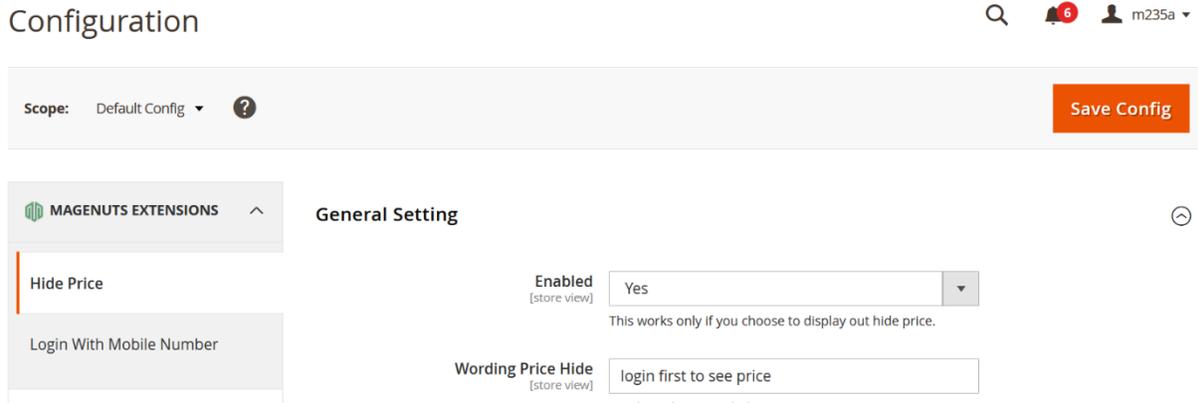

---

Please use the "**Merge**" upload mode. Do not replace the whole folders, but merge them. This way your FTP/SFTP client will only add new files. This mode is used by default by most FTP/SFTP clients' software. For macOS, it's recommended to use Transmit. If you install several extensions from Amasty, they will contain the same files from the Base package — feel free to overwrite them, these are system files used by all our extensions.

---

3. Connect to your Magento directory with SSH.
4. Run the following 3 commands:
   a. php bin/magento setup:upgrade
   b. php bin/magento setup:static-content:deploy
   c. php bin/magento setup:di:compile

MAGENUTS

# How Does It Work?

You can enable and disable this extension in the system configuration at any time. You can do this by opening the backend menu Stores > Configuration. There you will find the entry Magenuts Extensions > Hide Price. After clicking on it you see a dropdown box where you can enable/disable the module. Save the configuration and delete the cache.

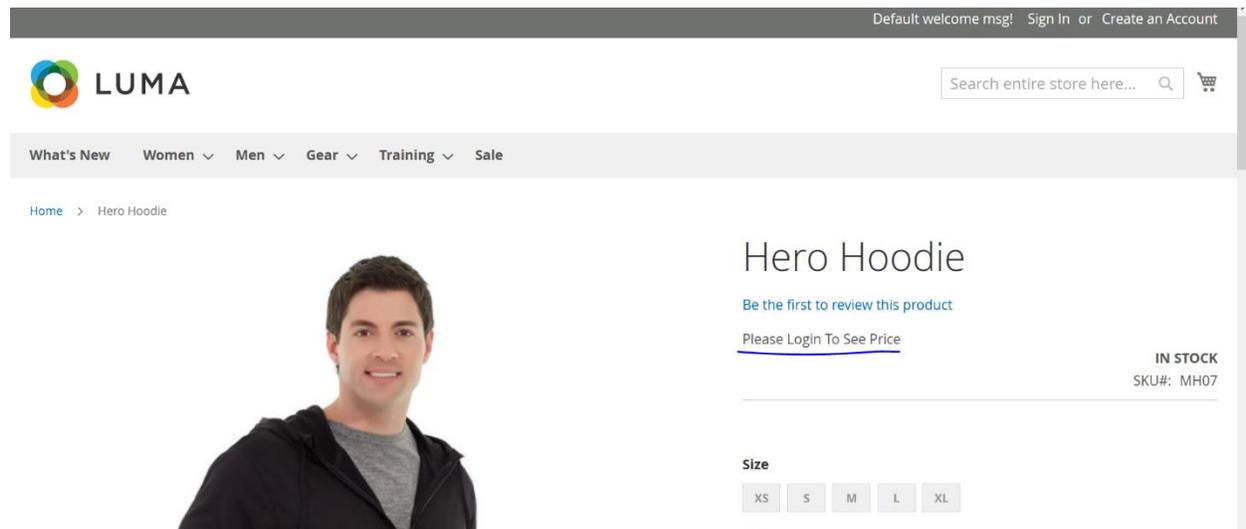

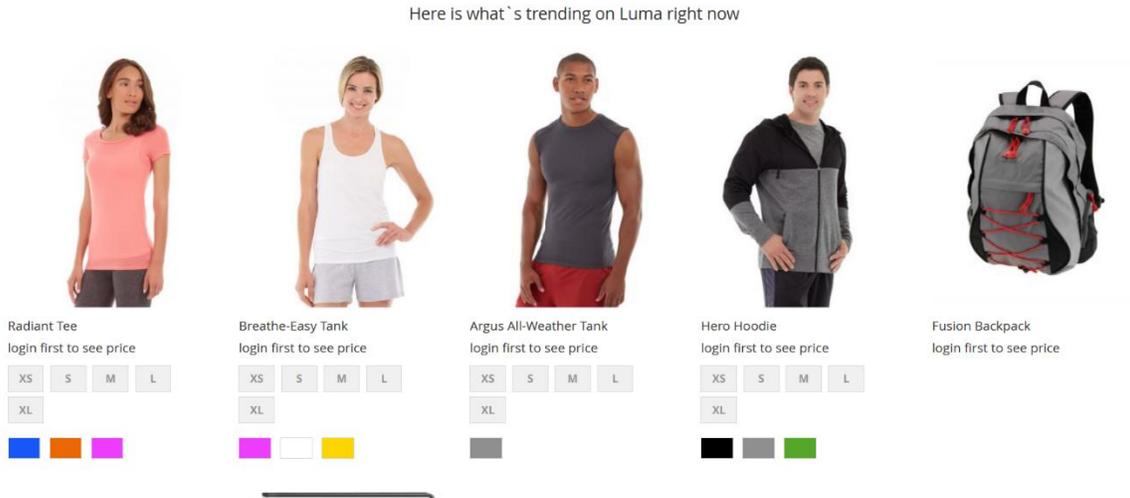

Also you can go through Magenuts menu

https://magenuts.com

MAGENUTS

## Frontend View

Clear cache from System > Tools > Cache Management if required. You will see the message instead product price everywhere like homepage, category pages and product detail page as well.
